Recent work experiences

Idealo - Frontend Engineer 04.2021 - Present

- Developed and enhanced the Local Offers feature, integrating it into idealo's core price comparison application
- Created a map-based interface with location detection to display offers around the users' location
- Transitioned the product from monolith to microservices for scalability
- Contributed to product strategy, user experience, and merchant engagement

Miles - Web Developer 06.2020 - 11.2020

- Led the planning, development, and deployment of a new website for Miles Mobility, a prominent car-sharing company in Germany
- Built a headless CMS using Contentful and Gatsby.js, enabling dynamic features and seamless marketing content updates

Education

Beuth Hochschule Berlin
Bachelor of Computer Science, 2017
